

SR-L700 System by Stax

EARSPEAKER & KIMIK 2 ENERGISER

About Stax

Stax was formed in 1938 in Japan and in 1960 they released their first electrostatic Headphone or 'Earspeaker' as they are better known. Being an electrostatic design, a Stax Earspeaker requires an energiser unit to drive them making it a complete package. Over the last 50+ years Stax have refined their designs making them the leaders in electrostatic headphones and arguably the leaders in high performance headphones today.

Symmetry is pleased to announce the availability of the Stax SR-L700 System

The Stax SR-L700 has been one of the most popular and well regarded Lambda Earspeakers ever.

Finding a perfect partner for the Stax L-700 was easy - because its a natural match for the Stax SRM-006tS.

A new Kimik version of the Stax SRM-006tS has been developed by Mark Dolbear and Nigel Crump. This proved to be the ideal energiser for the Stax SR-L700. Details of the new Kimik 2 Stax energiser's is available now.

When purchased as individual pieces the Stax SR-L700 has a retail of £1195. The Stax SRM-006tS Kimik 2 is priced at £1395. When bought separately the price is £2590. The Stax SR-L700 System has a retail of £2495. Saving £95.00 if bought as a system.

If you need your current Stax SRM-006tS or Stax SRM-007t II modifying up to Kimik 2 specification, then please contact nigel@symmetry-systems.co.uk or mark@electromod.co.uk.
